The Leonardo Society of Balliol College, Oxford. June 1946
A “homemade” osmometer

the “impermeable rubber sac”
“Yes, I know it’s 2,000 volts, but go ahead, grab that capacitor….

… just make sure you don’t have sweaty palms!”
Above, UW medical genetics professor Oliver Smithies (left) and fellow pilot Field Morey visit the Cessna 210 turbo super-charged aircraft which took them over the Atlantic Ocean to Europe. Below, Morey and Smithies return to the familiar controls. (Photos by Tom Rust)
Field Morey, right, and Oliver Smithies celebrate their return home.

Middleton fliers set two world records

Field Morey and Oliver Smithies crossed the Atlantic in a single engine Cessna, ala Charles Lindbergh.
