

N95 Extended Use/Re-Use Changes

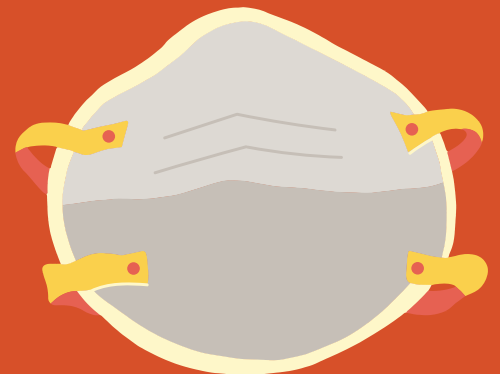

*UPDATES ARE BASED ON NEW CDC GUIDANCE

N95s are now to be worn up to **5 times** when not used on a known COVID+ patient, PUI or a patient on isolation.

- This is a change from previous guidance which allowed for 5 days of use.

N95s used on COVID+, PUI or patients on isolation are still **SINGLE** use.

N95s should be discarded when they become soiled or difficult to breathe through.
